

Sarit Sethi

Chicago, IL 60601 872-275-6211 saritsethi@gmail.com [Sarit Sethi | LinkedIn](#) -

Summary

Product executive with 15+ years building and scaling **enterprise data and intelligence platforms** across Fortune 200 (50,000+ employees) organizations and venture-backed startups. Known for translating ambiguous technical possibilities into structured roadmaps with clear P&L accountability, go-to-market discipline, and monetization rigor—from zero-to-one builds to mass adoption across globally distributed enterprises. Strategic partner to global technology and consulting leaders including AWS, Microsoft, and Deloitte, leveraging ecosystem capabilities to accelerate platform scale while co-owning multi-million-dollar AI budgets. Led enterprise-wide data modernization initiatives transforming fragmented analytics and reporting assets into governed, reusable enterprise data products.

Core Capabilities

- **Enterprise AI & Data Strategy** – Build enterprise AI deployment models including data-as-a-product frameworks, data ingestion governance, unified metadata management, and access controls. Drive AI and data literacy programs across technical and business stakeholders.
 - **Data Product Innovation** – Define and scale data products via the enterprise platform to maximize institutional knowledge and operationalize intelligence at scale.
 - **Enterprise AI Execution** – End-to-end delivery of AI solutions with deployment of LLM orchestration, agentic workflows, model tradeoffs, and quality assurance through golden prompt testing and evaluation frameworks.
 - **Strategic Product Leadership** – Translate business objectives into prioritized roadmaps with measurable outcomes. Build vs. buy frameworks, P&L ownership, platform thinking across Fortune 200 and startups.
 - **AI-Enabled Product Delivery** – Lead discovery-to-production cycles integrating AI across SDLC. Continuous measurement loops tracking adoption, performance, and business impact.
 - **Cross-Functional Stakeholder Leadership** – Drive alignment across C-suite, legal, risk, VC partners, data/governance teams, and user personas. Lead change management and AI literacy across organizations.
 - **Team Building & Cross-Functional Scaling** – Build and scale cross-functional teams across Product, Engineering, and Go-to-Market. Drive product-to-sales-to-marketing alignment for enterprise and SaaS growth.
-

Key Achievements

- **EDP Strategic Deployment:** Co-led vendor evaluation and architectural direction for enterprise-wide **EDP deployment** supporting governed, reusable data products.
 - **Rapid Enterprise Adoption:** Established a global standard AI platform that scaled adoption from **~12% to ~50% of the enterprise (25,000 users) within six months** through product-led enablement.
 - **Strategic Cost Engineering:** Developed a proprietary AI platform at <\$1/user/month, representing a **97% reduction** in operational costs compared to industry-standard solutions (~\$30/user/month).
 - **Workflow Integration:** Enabled **~200,000 monthly AI** interactions across knowledge discovery, drafting, and decision support by embedding AI into core workflows (Outlook, Teams, ServiceNow, Salesforce).
 - **Revenue & Efficiency Impact:** Spearheaded a client-facing collaboration solution instrumental in influencing **\$1B in revenue** generation and developed a provisioning tool that significantly reduced non-billable hours.
 - **SaaS Build & Scale:** Co-founded and scaled construction SaaS venture to **~\$10M ARR**, delivering ERP and marketplace platforms across **480 projects, 117M sq ft of development, and \$100M** in managed tenders.
 - **Cross-Functional Leadership & Scaling:** Built startup organizations from the ground up (**0 to 60 employees**) later directed enterprise teams of **30+ technologists** across a **7-product** portfolio.
-

Experience

Product Director, AI & Automation May 2022 to February 2026

AECOM – Chicago, IL

- **Vision & Platform Strategy** – Defined enterprise AI and data product vision, operating model & roadmap focused on embedding AI within daily workflows, institutionalizing knowledge, and operationalizing trust and governance at scale.
- **Product-Led Growth & Adoption** – Scaled product-led adoption through multimodal access, collaborative features designed to drive organic adoption, and embedded enterprise workflows across platforms including Outlook, Teams, ServiceNow, and Salesforce.
- **AI Platform Architecture** – Architected enterprise AI platform including LLM routing, RAG knowledge systems, agent handoffs, and governed data access frameworks spanning structured and unstructured sources.
- **AI & Data Operating model** – Established AI and data operating model in partnership with Legal, Risk, and Data Governance, defining AI use policy, data ingestion playbooks, and AI-ready enterprise data products.
- **Data Product Strategy**: Defined base data products and AI ready consumer data products, **integrating critical data dimensions across** structured, semi-structured, and unstructured sources **to fuel enterprise AI**.
- **Applied AI Practice & Delivery Innovation** – Prototyped orchestration patterns and utilized tools like Aha and Microsoft Copilot to embed AI directly into product delivery processes, accelerating discovery and definition.
- **Budget Governance & Capacity Planning** – Managed multi-million-dollar AI budgets using PI planning, feature t-shirt sizing, and sprint velocities to define resource needs and align capital with backlog delivery.
- **Data First Business Intelligence** – Rationalized enterprise reporting and analytics assets to reduce redundancy, improve data quality, and align KPIs across business units.
- **Organizational Leadership & Portfolio Delivery** – Led a cross-functional product and engineering organization spanning 3 Product Managers and 30+ technologists, owning portfolio strategy, prioritization, and value realization across a 7-product AI and digital platform suite including client collaboration, environment provisioning, and ESG intelligence solutions.

Co-Founder & CPO/COO April 2016 to November 2021

ARCHER TECHNOLOGIES (BuildSupply) – Gurugram, India

- **Venture Creation & Product Development** – Built vertically integrated SaaS platforms for the AEC industry from zero-to-one spanning project delivery ERP, procurement, inventory, and marketplace ecosystems.
- **Commercialization & Revenue Growth** – Led pricing, packaging, enterprise sales enablement, and customer value strategy scaling platforms to multi-million-dollar recurring revenue.
- **Enterprise Deployments & Systems Integration** – Drove implementation of vertical ERP platforms automating procure-to-pay lifecycles, integrating with enterprise systems including SAP and Oracle.
- **Marketplace Platform Development** – Designed and launched supplier and contractor marketplace platforms enabling demand aggregation, vendor discovery, and transaction orchestration.
- **Investor Relations & Exit** – Led investor engagement, fundraising across venture rounds, board reporting, and strategic positioning through to final transaction and exit via competitor acquire.
- **Organizational Build & Scale** – Built and scaled cross-functional product and engineering teams from founding stage through growth, establishing delivery operating models and release governance.

Early Career | Innovation & Entrepreneurial Foundations July 2007 to March 2016

Multiple Organizations — India

- **Entrepreneurial Platform Build** – Co-founded Letz SLAB, launching a peer-to-peer construction equipment marketplace enabling contractor asset sharing and utilization.
- **Technology Innovation & Digital Delivery** – Led early adoption of digital construction technologies including BIM 6D and Procore at M+W Group (Exyte), improving project visibility and delivery governance.
- **Global Client Program Exposure** – Supported technology-led delivery across large capital programs for clients including Intel, Procter & Gamble, Michelin, and Mondelez.

Education

Bachelor of Architecture

Certifications & Courses

CSPO - Certified Scrum Product Owner, AI Evals Course - Maven, AI for business leaders - Maven
